

4FRNT

2025/26 SKI CATALOG

FREERIDE COLLECTION

Created for those who view the mountain with a different lens, seeking creativity and exploration. Slash pow, pop off side hits, tear up groomers - these skis encourage you to take your style everywhere on the hill.

SWITCH

MSRP: \$739

163cm

170cm

177cm

184cm

The Switch returns for the 25/26 season updated for maximized all mountain performance and increased durability. To start we smoothed out the tip and tail splay and increased the height of the early rise to create a cleaner tip profile to eliminate tip deflection and maximize your capabilities across all conditions. Next we upgraded to thicker edges and base material to ensure that the Switch is the most durable ski on the hill. The minute you click into the Switch, you gain an entirely new perspective of the mountain, seeing every piece of terrain as an opportunity to play. From railing turns of any size, to powering through zipper line moguls, boosting off side hits, or zooming backwards past your friends, the Switch is the only ski you want to grab when you're off to the resort. For those seeking to explore every nook and cranny from top to bottom, it's time you Switch it up.

DEVASTATOR

MSRP: \$789

172cm

179cm

186cm

Year after year our Team chooses this ski as their daily driver due to its unwavered ability to charge, surf, and stomp in such a large variety of snow conditions. Our signature multi radius rocker profile enables your tips to naturally rise to the surface of fresh snow, giving you the ability to slash turns, navigate tight trees and ride away from cliff drops like a pro. Under foot you experience unmatched edge control, providing a stronger grip in firm conditions to carve turns just like a cambered ski. The Devastator will boost your confidence to ski faster, charge harder, and go bigger. Click in and buckle up for the ride of your life!

DEVASTATOR JR

MSRP: \$419
147cm **157cm**

The Devastator JR is the highest performing all-mountain ski for smaller shredders! We took the same freeride DNA from the Devastator and shrunk it down for skiers who are looking for the complete package in a shorter length. With tips that naturally rise to the surface, you can slash turns, navigate tight trees, and ride away from cliff drops like a pro. When you're flying down groomers or firm snow you can count on the unwavering edge grip to keep you flowing from turn to turn, top to bottom. If you are looking to progress everyone on the mountain, click into this durable ski, designed to ski fast, charge hard and go big everywhere.

INTHAYNE

MSRP: \$789
181cm **188cm**

Legendary Utah based freeride skier, Thayne Rich created this ski to be the ultimate weapon for shredding powder and ripping it up in the backcountry. This ski has the power to charge big lines and stomp landings, but a nimble feel that allows you to carefully dissect technical pillow lines. If you want to ski natural features and throw tricks in the backcountry like you're hot lapping the terrain park, Thayne's signature ski is your ticket to stick-it!

Are you looking for a season of resort domination? The MSP CC has heard your call and returns with its newly improved Aspen-Maple core with titanal laminate, providing more energy and a more responsive feel. The MSP CC enables you to initiate the sidecut and pressure the shovel of the ski with much less effort. Its smooth, damp ride instills confidence and is just as comfortable on edge as it is powering through variable conditions. When it snows, the wide shovel and gradual tip rocker provides unwavering float when you pull up to your favorite powder stash. Everything you put into this ski you get right back, empowering you to ski harder than ever before.

ERIC HJORLEIFSON COLLECTION

Designed and tested by ski legend Eric “Hoji” Hjorleifson to crush steep and deep terrain with ease. A lightweight, hard charging construction will have you pivoting through gladed trees, shredding the sidecountry, and touring into the backcountry just like Hoji!

4-LOCK™
SKIN SYSTEM

ALL SKIS IN THE ERIC HJORLEFSON COLLECTION COME EQUIPPED WITH 4-LOCK™ SKIN INTEGRATION SYSTEM

4-Lock™ System is a fully integrated ski and skin system unlike anything else on the market. A self locking skin strap passes through an inconspicuous 12x9mm hole in the tail of the ski, locking the skin to the ski and eliminating frustrating gear failure forever.

By placing the hole in the 20cm's from the tail, we reduced the skin length by 12% to improve uphill efficiency without affecting the skis downhill performance. This reduced skin length weighs in at less than 240g per skin and folds up impossibly compact, saving you more weight on your feet and more space in your pack than any other set up on the market.

RAVEN

MSRP: \$799

170cm

177cm

184cm

190cm

The Raven is the ultimate blend of uphill efficiency and soft snow performance. A smooth rocker profile naturally brings your tips to the surface of fresh snow, making breaking trail on the skin track and floating through powder easier than ever. When you find yourself in technical terrain, the pre-bent rocker shape frees your mobility from a long, sluggish effective edge, enabling quick line adjustments and supreme speed control. If your ideal ski day entails getting far away from the crowds and into pristine, untouched slopes, the Raven is a dream come true!

For years, 4FRNT skiers have requested a cambered ski at a weight comfortable for touring and downhill performance you can charge on. You asked and Eric Hjorleifson listened! Cue the NEVAR (Raven spelled backwards) - Eric's newest promodel ski. Camber underfoot and a balanced flex offers ample edge hold and maximum stability in the firm and variable snowpack. When you need to react quickly or slash speed, the early rise in the tip and tail enable you to release from your turn with ease and efficiency. This ski was designed to balance out 4FRNT's selection of award-winning reverse cambered skis and increase our offerings to an even wider variety of skiers.

Eric 'Hoji' Hjorleifson designed this ski to be every skier's dream powder ski. The updated inclusive sizing for the Hoji makes it the best powder ski for everyone on the hill! The Aspen-Maple core with carbon fiber stringers provides ample energy at a weight that is as comfortable on the up as it is on the down. The Hoji's unique Multi Radius Rocker provides maximum control when navigating firmer snow and an even more surfy playful feel in deeper snow. Whether you are hunting out powder stashes in the trees, zooming down your favorite groomers, or heading out of bounds, you can count on the Hoji to deliver.

RENEGADE

MSRP: \$839

177cm

184cm

191cm

Just when you thought the Renegade couldn't get better, Hoji does the impossible. New and improved for this season the Ren is back with a longer more drawn out tip rocker. A slight increase in overall tip height, longer tip splay, and a less abrupt tip shape increases flotation, eliminates tip hook, and eliminates tip deflection in variable snow pack. Pair this with a slight increase in stiffness in the tail of the ski and you get an improved Renegade that is more capable than ever before. The Renegade is light and nimble on your feet, yet extremely stable in big mountain terrain. The Renegade's unique rocker profile empowers you to feather and pivot your way through tight terrain and ditch speed or slash deep turns at any moment. Click in and charge your way though the biggest, gnarliest, deepest terrain the mountains have to offer, just like Hoji.
